

MAT116 – Programming with MatLab

Exam - 15th February 2019

Lukas Burch, Elise Le Meledo, and Fatemeh Nassajianmojarrad

Institute of Mathematics, University of Zurich

Exam instructions:

1. Download the files of the exam from the website of the course:
`www.math.uzh.ch/hs19/mat116`
2. Extract the files with the password written on the blackboard
3. Save all your files with the **exact name** as written in the exercises in one folder.
Do **not** use sub-folders.
Attention, if you choose a wrong name of your functions or plots or scripts or save in a wrong directory, we can't check the file, hence you will have **0 points**.
4. Define the functions' arguments **in the given order**.
5. Don't forget to clear your workspace when you finish an exercise

Exam modalities:

- You have 2 hours.
 - If something is not clear, raise your hand and ask the instructors.
 - You are allowed/supposed to use the Matlab help tool.
 - You are not allowed to use internet but the my page and the webpage of the course to download and upload the exam. If you try to access any other websites, you fail.
 - You are not allowed to communicate with other people inside and outside the room. If you try to do so, you fail.
-

How to submit the exam:

1. Login under the *my* webpage <https://math.uzh.ch/my>.
2. Go to **Lectures**.
3. Switch to semester HS19.
4. Programming in MATLAB has an open upload area with an 'upload'-icon. Click on it.
5. Upload all the exam files one by one, included the ones necessary to run your scripts/functions.
6. If you uploaded a wrong file, delete it from the upload area and upload the good one again.
7. When you have uploaded all your files, call an instructor and wait for the approval to leave.
8. Mark the upload complete. To do so, click on the lock.

Good luck!
